

Gemini

Workshop Series

Gemini

Day 1

App Dev

Day 2

Web Dev

Day 3

ML

Hello, Darryl

How can I help you today?

Generate unit tests for the following C# function

Suggest videos to quickly solve a problem

Ideas to surprise a friend on their birthday

Suggest beautiful places to see on an upcoming road trip

Your conversations are processed by human reviewers to improve the technologies powering Gemini Apps. Don't enter anything you wouldn't want reviewed or used.

Let's begin!

Structure

3 Parts

Basic Concepts

Making the app

Conclusion

How is an app built?

Swift

Java

Kotlin

Flutter

React Native

Xamarin

ionic

Swift

Java

Kotlin

Flutter

React Native

Xamarin

ionic

Why Flutter?

Why Flutter?

- Cross Platform
- Fast
- Gaining popularity rapidly

Fundamentals

What is Flutter?

Flutter is a framework!

Dart

A language similar to C++

Widgets

Everything is a widget!

Button

Password

**Munchkin cats
have short legs**

Some basic widgets

Text

ElevatedButton

Scaffold

```
Text(  
'Hello, World!'  
)
```

Hello, World!

```
Text(
```

```
  'Hello, World!',
```

```
  style: TextStyle(  
    fontSize: 20,  
    color: Colors.blue),
```

```
)
```

Hello, World!

ElevatedButton ()

Button

```
ElevatedButton (
```

```
  onPressed: () {},
```

```
  child: Text('Button')
```

```
)
```

Button

Scaffold()

Title

App dev is amazing!

```
Scaffold(
```

```
  appBar: AppBar(  
    title: Text('Title'),  
  ),
```

```
  body: Center(  
    child: Text(  
      'App dev is amazing!',  
    ),  
  ),
```

```
);
```

Title

App dev is amazing!

Placeholder()

Text & TextStyle

Row

TextField()

Type here

```
TextField(
```

```
  decoration: InputDecoration(
```

```
    border: OutlineInputBorder(),  
    labelText: 'Type here',
```

```
  )
```

```
)
```

Type here

Column()

Type here

send

Column(

children: []

)

Type here

send

```
Column(
```

```
  children: [
```

```
    TextField(...),
```

```
    SizedBox(height: 80),
```

```
    ElevatedButton(...)
```

```
  ],
```

```
)
```

Type here

send

Row()

Type here

send

```
Row(
```

```
  children: []
```

```
)
```

Type here

send

```
Row(  
  children: [  
    Expanded (  
      child: TextField(...),  
    ),  
    SizedBox(width: 30),  
    ElevatedButton(...)  
  ],  
)
```

ListView

ListView.builder

ListView()

One

Two

Three

This is a subtitle

Four

Five

```
ListView(
```

```
  children: [
```

```
    ListTile(  
      title: Text('one'),  
      leading: Icon(...),  
    );
```

```
    ...
```

```
  ]
```

```
)
```

One

Two

Three

This is a subtitle

Four

Five

```
ListView.builder(
```

```
    itemCount: messages.length,
```

```
    itemBuilder: (context, index) {
```

```
        return ListTile(...);
```

```
    },
```

```
)
```

Message 1:

My first message

Message 2:

I can type in the text field

Message 3:

and hit the send button

Message 4:

to make my message appear in the list above

Type here

send

```
List<String> messages = [];
```

```
ListView.builder(  
    itemCount: messages.length,  
    itemBuilder: (context, index) {  
        return ListTile(  
            title: Text(  
                'Message ${index + 1}: \n${messages[index]}'  
            ),  
        );  
    },  
)
```

Message 1:

My first message

Message 2:

I can type in the text field

Message 3:

and hit the send button

Message 4:

to make my message appear in the list above
